📁 Portfolio | Roll No: 23BCE11262 | Computer Science & Engineering (Core), VIT Bhopal

Summary

Results-driven software developer with expertise in **Swift (iOS)**, **MERN stack** (MongoDB, Express.js, React.js, Node.js), and **Machine Learning**, adept at designing scalable architectures, optimizing algorithms, and shipping production-grade software. Proven ability to translate complex business requirements into robust, maintainable solutions.

Experience

amasQIS.ai 📄 **June 2025 – Dec 2025**

AI/ML Intern | Python, FastAPI, Machine Learning, MERN *Remote*

- Completed a structured **2-month** ML training program covering supervised and unsupervised learning algorithms, model evaluation, and real-world implementation in Python.
- Migrated a legacy backend codebase to **FastAPI**, improving API response structure, scalability, and maintainability for production deployment.
- Assisted in fine-tuning an **NLP-based ML model** to auto-generate ICD-10 medical codes from patient symptoms, achieving **92%** precision on a 15,000-record test set.
- Contributed to **2 production features** across a 4-month project phase, reducing manual medical annotation time by **30%** through intelligent workflow automation.

Projects

📁 **FocusFlow** | *Swift, SwiftUI, CoreData, MVVM, Combine, UserNotifications, Swift Charts* 📄 GitHub

- Built a **full-stack iOS productivity app** using **SwiftUI** and **MVVM architecture**, featuring a Pomodoro timer driven by **Combine publishers**, task management with **CoreData CRUD**, daily streak tracking with a **GitHub-style heatmap**, and a progress analytics dashboard built with **Swift Charts**.
- Implemented **NSManagedObject** subclasses with custom computed properties, **CoreData relationships** between Task and FocusSession entities, and **UNUserNotificationCenter** for timer completion alerts and daily reminders.

📁 **HireGuard AI** | *Python, NLP, scikit-learn, Flask, TF-IDF* 📄 GitHub

- Built an **NLP-powered fake job detection system** that classifies fraudulent job postings using **TF-IDF vectorization** and **ML classifiers**, helping job seekers identify scam listings with high accuracy.
- Engineered a **Flask REST API** to serve model predictions in real time, enabling seamless integration with frontend interfaces and achieving sub-200ms average response latency.

Technical Skills

Languages: C, C++, Java, JavaScript, Python, HTML/CSS	Databases: MySQL, MongoDB
Web Development: React.js, Node.js, Express.js, Tailwind CSS, WebSockets, FastAPI, Redux	
DevOps & Cloud: Docker, AWS	AI/ML: scikit-learn, TensorFlow, NLP, TF-IDF
iOS Development: Swift, SwiftUI, CoreData, MVVM	Tools: Git, GitHub, VS Code, Linux
CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Theory of Computation, Compiler Design, Computer Networks	

Education

Vellore Institute of Technology, Bhopal **2023 – 2027 (expected)**

B.Tech. in Computer Science and Engineering (Core) *CGPA: 9.31**

Jagat Taran Golden Jubilee School, Prayagraj **2022**

Senior Secondary (Class XII) – Science (PCM) *88%*

Jagat Taran Golden Jubilee School, Prayagraj **2020**

Secondary (Class X) *91.6%*

Achievements / Extracurricular

- 📁 **Competitive Programming**
 - Pupil (Rating: 1360)** on Codeforces | **3-Star (Rating: 1692)** on CodeChef | **Rating: 1552** on LeetCode – demonstrating strong algorithmic proficiency across platforms.
 - Solved **600+** coding problems across Codeforces, CodeChef, and LeetCode, demonstrating advanced problem-solving skills in Data Structures, Algorithms, and Dynamic Programming.
- 📁 **Certifications**
 - Certified **AWS Solutions Architect – Associate (SAA-C03)** – validating expertise in designing **scalable, fault-tolerant, and cost-optimized cloud architectures** on AWS.
 - Certified **AWS AI Practitioner (AIF-C01)** – validating foundational knowledge of **Artificial Intelligence, Machine Learning, and Generative AI** on AWS cloud infrastructure.
 - NPTEL Elite Certificate** – Introduction to Machine Learning by **IIT Madras** | **Bits and Bytes of Computer Networking** by **Google** (Coursera) – TCP/IP, DNS, and networking protocols.
- 📁 **Extracurricular**
 - Technical Core Member – Freelancing Club at VIT Bhopal, supporting technical skill development and freelancing initiatives for the student community.
